

Canoe & Kayak Plastic Repair kit

Hgk109 Canoe & kayak plastic repair kit

The Malcom Canoe and Kayak Plastic Welding Kit, with the Weldy Plus Hot Air Tool, is intended for use by professionals selling and servicing thermoplastic boats. It is also an ideal kit for camps and boat rental facilities for repairs to their fleets.

Most of the recreational canoes and kayaks today are made from a thermoplastic material, mainly PE. This plastic is very rugged and when treated properly can last a lifetime. However, after a while the bottom of these boats wear thin due to people dragging them over rocks and sand. Occasionally the Canoes or Kayaks are not tied down properly when transported and fall off the car damaging them. The damaged plastic can be repaired with the Malcom Company Canoe and Kayak Plastic Repair Kit.

The kit comes with an assortment of welding rod that matches the most common colors on the market. The Canoe and Kayak Plastic Repair Kit is designed for the repair technicians intended for professional use. Rental facilities, boat dealers and camps should have one of these kits on hand for fast on site repairs to their fleet of boats and to service their customers.

HGK103 KIT COMES COMPLETE WITH THE FOLLOWING

- Weldy Plus hot air tool 120V 1500 watts
- Speed welding tip for 1/4 inch triangle rod, push fit
- Welding nozzle for flat welding tape
