Lineman's Triple Square Tower Wrench

Three Square Sizes = 1-1/8", 1-5/16" and 1-1/2"

Heavy Duty cast iron socket and 12", 15" or 18" stamped steel handles provide up to 300 lb-ft torque

The NEW Lowell #100T Series Tower Wrenches provide greater flexibility for linemen dealing with the most common nut sizes of tower fasteners. The 1-1/8" x 1-5/16" x 1-1/2" triple square socket allows for tolerances on 1-1/8" square nuts (5/8" bolts), 1-1/4" square nuts (3/4" bolts) and 1-3/8" square nuts (7/8" bolts). It also fits 1-1/2" hex bolts. The Bolt-Thru design allows threaded rod to pass thru the socket so that nuts can be secured on any threaded length. The 100T Series wrenches have heavy duty stamped riveted metal handles with a vinyl grip. The complete assemblies are coated with an epoxy paint for durability and easy cleaning. Designed specifically for utility, construction and maintenance workers, the 100T Series tower wrenches' extended length stands out on the job.

**We also offer a variety of other square and hex sockets.*

** All Lowell lineman's wrenches are "bolt-thru"*

<u>Part Number</u>	<u>Description</u>	<u>List Price (with Socket)</u>
